

Recycled and Fresh Water Filters

Case Study Details

First Bauxite was expanding their Guyana facility and needed new filtration equipment for various plant water uses. H2Flow supplied inline filters from ACME.

ACME supplied four basket strainers with carbon steel bodies and 316ss screens, designed to ASME Section VII, as follows:

FLOW	FILTRATION
892 m3/hr	5000 micron
87.8 m3/hr	1000 micron
24 m3/hr	1500 micron
2.4 m3/hr	100 micron

Engineer: Lycopodium and JDS Energy & Mining

Construction Date: January 2019
