

Landfill Gas Blowers for Landfill Gas Flaring System

Case Study Details

Enviro EMD was building a Landfill Gas Flaring System for the City of Ottawa and needed new landfill gas blowers. H2Flow supplied two gas blower packages from Continental Blower, model 77.03 with 50 HP motors. Packages included explosion proof motors, non-sparking aluminum guards, heresite lining on the internal blower casing and impellers and special blower gas seals.
